

WEEE (Waste Electrical & Electronic Equipment)

We take our responsibilities under the WEEE Regulations seriously in line with our corporate and social responsibilities. We meet the requirements with regard to disposal of WEEE in accordance with the WEEE Directive 2006 and have joined registered compliance scheme ref. WEE/BG0712VR.

In regard to the Waste Electrical and Electronic Equipment regulations, our Environment Agency producer registration number is WEE/UP3538PY/SCH.

Electrical and electronic equipment should not be disposed of with general waste. It should be separately disposed of to enable safe and effective treatment and recovery. The crossed-out bin (WEEE) symbol placed on product or labeling/packaging reminds you of the need to dispose of the product correctly at the end of its useful life. In this way you will assist in the recovery, recycling and reuse of many of the materials used in the product, thereby helping to protect our environment.

You can either dispose of WEEE in accordance with local ordinances and regulations or when buying a new product from BPR Medical you have the possibility to return another end of life product of equivalent type that has fulfilled the same functions as the supplied equipment. You are responsible for the return packaging and carriage costs but we will process the returned WEEE on your behalf at no cost to you.

Return address for WEEE:

BPR Medical Limited
WEEE Processing
22 Hamilton Way
Oakham Business Park
Mansfield
Nottingham
NG18 5BU

With your help it is possible to reduce the amount of electrical and electronic waste ending up in landfill and to protect the environment by preventing the release of potentially hazardous substances.

Oxygen Sensors (electrochemical)

We minimise waste as far as possible in all our operations and dispose of it waste through safe and responsible methods. We meet the requirements with regard to disposal of hazardous waste in accordance with The Hazardous Waste Regulations 2005 through a fully licensed waste management company.

In view of this we offer a service to our customers where we will safely dispose of any returned depleted oxygen sensors through our oxygen sensor disposal service. If required a returns bag and address label will be provided upon request. This service is offered free of charge - but excludes the return carriage costs.

Return address for Oxygen Sensors:

BPR Medical Limited
Oxygen Sensor Recycling
22 Hamilton Way
Oakham Business Park
Mansfield
Nottingham

Batteries

Depleted batteries supplied with our products can be disposed of in accordance with local regulations. Alternatively you can take depleted batteries to a free of charge collection point such as those offered by BatteryBack. To find the nearest collection point go to www.batteryback.org.

When battery powered equipment is returned to BPR Medical for service, repair or calibration we will test the batteries - if found to be depleted we will offer to dispose of them on your behalf.

Should you have any queries regarding the above, please do not hesitate to contact us on:
